

## Electrically-Compatible PV Modules for M250 and M215

---

Updated July 2013

The photovoltaic (PV) modules on this list have been verified for electrical compatibility with Enphase Microinverters over the cell temperature range of -25C to +75C. This document is intended as a reference and is not an exhaustive list of compatible modules. For applications outside of this temperature range, the system designer should verify that the module voltage and/or current would not exceed the microinverter model's nameplate ratings under all expected environmental conditions. The module specification sheet contains all of the necessary module information to make this determination. The ASHRAE Handbook ([www.ashrae.org](http://www.ashrae.org)) is the recommended source for weather data.

Check for updates to this document at <http://www.enphase.com/support>.

If a specific module does not appear on this list, use the Enphase [Compatibility Calculator](#) to determine compatibility.

---

**CAUTION: Enphase® M250™ and M215™ Microinverters can be paired only with a 60-cell PV module. Modules paired with the M250 must use "PV Wire" or "PV Cable" to be compliant with NEC 690.35(D) for Ungrounded PV Power Systems.**

---

### Electrical versus Mechanical Compatibility

The modules on this list are verified for electrical compatibility, but **cannot be verified for mechanical compatibility** with Enphase Microinverters. To ensure mechanical compatibility, be sure to order the correct connector type for both microinverter and PV module from your distributor.

---

**CAUTION regarding Mechanical Compatibility of DC Connectors:** Be aware that inclusion on this list indicates electrical compatibility, but does not guarantee **mechanical** compatibility of the PV module connectors. Be sure to order the correct connector type for both microinverter and PV module from your distributor.

---

Enphase Microinverters must be ordered for specific module connector types. Microinverters are manufactured with two types of DC connectors for mating with PV modules. These are MC-4 and Tyco connectors. The polarity of the DC connectors on the microinverter varies with the type of connector:

- When your microinverters are built with **MC-4 compatible (S12/S22) connectors**: The positive DC output of the PV module (+) connects to the microinverter connector *labeled* negative (-).
- When your microinverters are built with **Tyco (S13/S23) connectors**: The positive DC output of the PV module (+) connects to the microinverter connector *labeled* positive (+). However, Tyco connectors can vary in polarity. With Tyco connectors either the male or female connector may be positive, but only the MALE positive will mate with Enphase Microinverters with S13/S23 connectors. Be sure to order the correct connector type for both microinverter and PV module from your distributor.

Usually, the electrically-positive output of the PV module always connects to the positive input of the microinverter. However, PV modules come with a variety of labels. For more information, refer to "**Mating Microinverters with PV Modules for Correct Polarity**" (see "Technical Briefs" under the Enphase downloads at <http://www.enphase.com/support>).

During installation, the status LED of each microinverter emits six green blinks **one to two minutes** after DC power is applied. This verifies normal operation and correct polarity of connections.

### Determining Appropriate Module Size

The appropriate module power rating for a given application depends on the specifics of that installation. Our paper, “**Sizing Solar Modules for Microinverters**” (see “Technical Briefs” under the Enphase downloads at <http://www.enphase.com/support>), outlines specific factors to consider when determining optimum module power rating. A generally accepted practice is to use a module with an STC power rating of 1.2 times the AC power output rating of the inverter. Many system designers use a multiplier of 1.25 or 1.3. For an M250 Microinverter, this would suggest a module power rating of 228W to 300W (STC) or higher. The M215 can be paired with modules up to 270W (STC) or higher.

**Note:** Enphase no longer manufactures or sells the M190, D380, or M210 microinverters. We will continue providing support and warranty for these products.

### Electrically-Compatible PV Modules

The following table lists PV modules that are electrically compatible with Enphase Microinverters. Columns one and two list the brand and model for each PV module. Column three lists the Enphase Microinverter models that can be paired with that PV module.

**WARNING:** The Enphase M215 and M250 Microinverters work ONLY with 60-cell modules. Damage to equipment can occur if the M215 or the M250 is connected to a 72-cell module.

Westinghouse Solar	AC 235 (WLW-235) <sup>2</sup>	M250 and M215
Westinghouse Solar	AC 230 (WLW-230) <sup>2</sup>	M250 and M215
Weswen	ZDNY-250C60	M250 and M215
Weswen	ZDNY-245C60	M250 and M215
Weswen	ZDNY-240P60	M250 and M215
Weswen	ZDNY-240C60	M250 and M215
Weswen	ZDNY-235P60	M250 and M215
Weswen	ZDNY-230P60	M250 and M215
Winaico	WSP-265P6	M250 and M215

<sup>2</sup> Ships with Enphase Microinverter included.

<b>Manufacturer Name</b>	<b>Model</b>	<b>Enphase Microinverter</b>
Winaico	WSP-265M6	M250 and M215
Winaico	WSP-260P6	M250 and M215
Winaico	WSP-260M6	M250 and M215
Winaico	WSP-255P6	M250 and M215
Winaico	WSP-255M6	M250 and M215
Winaico	WSP-250P6	M250 and M215
Winaico	WSP-250M6	M250 and M215
Winaico	WSP-245P6	M250 and M215
Winaico	WSP-245M6	M250 and M215
Winaico	WSP-240P6	M250 and M215
Winaico	WSP-240M6	M250 and M215
Yingli Solar	YL270C-30b	M250 and M215
Yingli Solar	YL265C-30b	M250 and M215
Yingli Solar	YL260C-30b	M250 and M215
Yingli Solar	YL255C-30b	M250 and M215
Yingli Solar	YL250C-30b	M250 and M215
Yingli Solar	YL245P-29b	M250 and M215
Yingli Solar	YL245C-30b	M250 and M215
Yingli Solar	YL240P-29b	M250 and M215
Yingli Solar	YL235P-29b	M250 and M215
Yingli Solar	YL230P-29b	M250 and M215
Yingli Solar	YL225P-29b	M250 and M215
Yingli Solar	YL220P-29b	M250 and M215
Yingli Solar	YL215P-29b	M250 and M215
Yingli Solar	YL210P-29b	M250 and M215
ZG-Cells	ZG-240P	M250 and M215
ZG-Cells	ZG-235P	M250 and M215
ZG-Cells	ZG-230P	M250 and M215
ZG-Cells	ZG-225P	M250 and M215
ZG-Cells	ZG-220P	M250 and M215
ZG-Cells	ZG-215P	M250 and M215
ZG-Cells	ZG-210P	M250 and M215
Zhejiang Wanxiang Solar Co. Ltd	WXS220P	M250 and M215
